

Web Development Project User Stories

#	As a/an	I want to...	so that...
1	Delivery Partner	Find a store that sells quality pastries. I'm lazy so I will resort to checking their products on their website	I can easily digitize the menu for my app and cater to customers as soon as possible.
2	To Be Wife	Find a suitable price and style for my wedding cake and the duration it'll take to make the cake	I don't disappoint my wedding guest with a lackluster cake and have a memorable wedding
3	Student	I want to order a pie for my birthday	I don't have to search around for the right kind of pie for a long time.
4	Boyfriend	I want to find a suitable dessert venue for my date but I don't have the time to scout around	I have an impressed date and a good time with good cake and ambience.
5	Busy Person	I want to find out the best time I can visit the store so that I don't have to wait for long.	Less of my time is wasted waiting and I can get back to work ASAP.
6	Mother	I want to find out if a shop can create a custom pastry which isn't listed on the website for me.	I don't have to remember to call the store when it opens the next day and yet get the job done.
7	Confused Tourist	I've heard about this store but I am not quite sure about where it is located.	I can visit this store and make my trip worthwhile and not get lost in a part outside of Downtown Pittsburgh
8	Potential Partner	I want to know more about the store as I really enjoyed my last visit and want to see if I would like to partner with the store.	Figure out if the store history makes me want to invest.
9	Father	I want to create a custom cake for my daughter's birthday party and order it online	My daughter has a memorable 13th birthday.
10	To Be Fat Person	I want to fulfill my sugar cravings but am too lazy to visit	I can determine which product I want for what cost and if I.
